PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of hands-on experience building scalable web applications using React, Next.js, Node.js, TypeScript, and modern JavaScript ecosystems. Specialized in developing high-performance SaaS applications, API-driven systems and SEO-optimized platforms with strong focus on clean architecture, security, and user experience.

Experienced in full-stack product development, database design, authentication systems, API integrations, caching strategies, Dockerized deployments, and cloud platforms including Vercel, AWS, and DigitalOcean. Improved production performance by up to 40%, achieved Lighthouse SEO scores above 95+, and built reusable systems that reduced development time by approximately 30%.

Also experienced in MERN and PERN stack application development, building scalable SaaS platforms and API-driven systems.

Strong product mindset with experience working independently, shipping production-ready features, solving real-world engineering problems, and continuously learning modern software engineering practices.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Cross-Browser Compatibility, SEO Optimization, Performance Optimization

Backend: Node.js, Express.js, REST APIs, Authentication & Authorization, API Integrations, Server-Side Rendering (SSR), Full-Stack Application Architecture, Webhooks, Redis, Caching Strategies

Databases: MongoDB, PostgreSQL, MySQL, Supabase, Database Schema Design, Query Optimization

DevOps & Cloud: Docker, Docker Compose, Git, GitHub, CI/CD, GitHub Actions, Vercel, AWS, DigitalOcean

Security: Advanced Web Security Practices, JWT Authentication, Rate Limiting, CORS & CSP Configuration, OWASP Security Principles, XSS Prevention & Input Sanitization, Secure File Handling, Password Hashing & Salting, Secure API Development

Testing & Development: API Testing with Node.js Scripts, Jest (Foundational Knowledge), Playwright (Foundational Knowledge), Debugging & Performance Monitoring

Additional: Shopify App & Theme Development, Python, Selenium, n8n Automations, Figma, VS Code, Linux

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

Remote | 2026 – Present

- Developed and deployed full-stack web applications using Next.js, React, Node.js, MongoDB, PostgreSQL, and TypeScript.
- Built scalable frontend systems with reusable component architecture, reducing development time by approximately 30%.
- Improved application performance and frontend rendering, reducing load times by up to 40% through optimized rendering strategies, caching techniques, and efficient API handling.

- Built SEO-focused web applications achieving Lighthouse SEO scores above 95+.
- Designed responsive and cross-browser compatible user interfaces optimized for desktop, tablet, and mobile devices.
- Worked with Dockerized development environments and cloud deployments using Vercel, AWS, and DigitalOcean.
- Implemented secure authentication systems using JWT, API validation, rate limiting, and secure backend practices.
- Collaborated directly with clients to convert business requirements into production-ready solutions.
- Managed source control, deployments, and project workflows using Git and GitHub.

PROJECTS

Shopify Full-Stack Application (React + Polaris)

- Developed a full-stack Shopify application using React and Shopify Polaris.
- Integrated Shopify APIs and modern merchant workflows into a scalable admin interface.
- Focused on responsive UI architecture, performance optimization, and clean component structure.
- Application currently submitted for Shopify review.

MoviesMesh – Movie Discovery Platform

Live: moviesmesh.vercel.app

- Built a movie discovery web application using Next.js and TMDB API integrations.
- Implemented dynamic API data fetching, responsive layouts, and SEO-friendly routing.
- Optimized frontend performance, image loading, and client-side rendering for smooth user experience.
- Developed reusable UI components and clean frontend architecture using React and Tailwind CSS.

- Focused on responsive cross-browser compatibility and modern user interface design.

Domain Authority Checker Extension

GitHub: [Domain Authority Checker Repository](#)

- Developed a browser extension that checks SEO metrics including Domain Authority and Spam Score.
 - Added caching mechanisms and persistent tab handling to improve speed and user experience.
 - Optimized extension architecture for lightweight performance and fast interactions.
-

CookingArt – Recipe Platform

Live: [cookingart.vercel.app](#)

- Developed a modern recipe platform using Next.js and API-based dynamic content rendering.
 - Built reusable frontend components and responsive layouts.
 - Optimized SEO structure and frontend performance.
-

SkyZen – Weather Application

Live: [skyzen.vercel.app](#)

- Developed a weather application using Node.js and MongoDB with real-time API integrations.
 - Implemented responsive UI systems and location-based weather handling.
 - Focused on clean frontend architecture and API performance.
-

Movies Platform (React + Node.js + MongoDB)

- Built a full-stack movie platform with React, Node.js, and MongoDB containing over 20,000 movie records.
 - Scraped movie data using Python Selenium automation, cleaned datasets, and stored optimized records in MongoDB.
 - Developed scalable API handling and dynamic frontend rendering for large datasets.
 - Implemented SEO-friendly routing, optimized image handling, and responsive UI systems.
-

TikTokEmojiz.online (Client Project)

- Developed a production-ready Next.js website for a paid client project.
- Focused on responsive frontend architecture, SEO optimization, and performance improvements.
- Delivered a fast-loading and mobile-friendly web experience.

EDUCATION

Intermediate in Computer Science (ICS)

Pakistan

LANGUAGES

- Urdu — Native
- English — Fluent

ADDITIONAL INFORMATION

- **Available for remote full-time opportunities** within CET-compatible time zones.
- Strong interest in **scalable** SaaS products, modern web engineering, and high-performance frontend systems.
- Comfortable working in fast-paced agile environments and independently shipping **production-ready features**.

- Continuously learning modern software engineering practices, testing workflows, and scalable backend systems.
